Humboldt Bay Municipal Water District Groundwater Study

DWR Local Groundwater Assistance Grant Program, P84 LGA 2012 Application

BMS Electronic File: "Att9_LGA12_HBMWD_PERFORM_1of1"

Humboldt Bay Municipal Water District (HBMWD) has significant experience in administering grant funds and project loans from the California Department of Water Resources (DWR) and other governmental agencies for projects. HBMWD either has either completed or is in the process of working on the following projects with grant funds:

1. DWR Local Groundwater Assistance Grant, 2006
2. Federal Emergency Management Agency (FEMA) Hazard Mitigation Grant for the Techite Pipeline Replacement Project, 2011
3. Integrated Regional Water Management Plan, Proposition 84 grant for the Blue Lake/Fieldbrook Pipeline Replacement Project, 2011
4. Fish & Game, Fisheries Restoration Grant Program for the Mad River Flow Monitoring Study, 2012
5. FEMA Hazard Mitigation Grant for the Blue Lake/Fieldbrook Pipeline Replacement Project, 2012
6. California Department of Public Health, Proposition 50, Chapter 3 Water Supply Reliability Community Interties Project, 2012

The District is knowledgeable in the requirements of various grant programs and has successfully met these requirements on the projects identified above in addition to several other previous grant programs.

Previous groundwater studies have resulted in a greater understanding of the Mad River Basin hydrogeology and allowed for capital improvement recommendations which balance protection of the groundwater resource while increasing capacity of the HBMWD Ranney Collectors.
